

WILDLIFE IN NEED CENTER GIRL SCOUT PROGRAMS

2025 OPTIONS | GSUSA

These programs are designed with certain badges in mind. While they are best when done at The Wildlife in Need Center, they can be easily adjusted to be done at other locations. Every program will involve meeting some of our animal ambassadors in person. Full programs with indoor and outdoor components are approximately 90 minutes long, with shorter versions available upon request. We do not provide the badges.

ECO LEARNER DAISIES

In this program we learn about how the Wildlife in Need Center helps the animals that live right here in Wisconsin. Not only that- but we can meet some of them in person! We will also discuss how anyone can help protect wildlife and their habitats. Finally we will head outside and explore our own local environment

OUTDOOR ART MAKER DAISIES

Stripes on a skunk, swirls on a turtle shell, meet some animals who are walking art projects! We will learn about an environmental artist as well before we go outside and practice seeing and creating art in nature.

ANIMAL OBSERVER DAISIES

Observing animals has never been easier! In this program we will meet some animal ambassadors and watch what they do and discuss how their behaviors are different from their wild counterparts. We will also spend time outside playing an animal observation game and discussing how animals observe each other!

BUGS BROWNIES

Why are bugs important? What bugs live around me? In this program we meet some animals that need bugs to survive. We will also make some bug art and go outside to catch the bugs living right in the WINC's backyard!

ONE 30-60 MIN
PROGRAM
ONSITE: \$ 225
OFFSITE: \$ 250

ONE 60-90 MIN

WILDLIFE IN NEED CENTER GIRL SCOUT PROGRAMS

ECO FRIEND BROWNIES

Learn about what an animal rehabilitation clinic is and what we do. This program focuses on how our facility helps wildlife, and how the average person can help wildlife. We will meet some animals and head outside to explore a local habitat!

ANIMAL HABITATS JUNIORS

In this program we meet some animals that live here in Wisconsin and talk about some special adaptations they have to help them live here. We will discuss how the WINC helps wild animals, and how you can too! We will also go out and explore the prairie habitat surrounding our facility and discuss why it is unique from other types of habitats.

NIGHT OWL CADETTES

This program begins indoors with a presentation about animals that come out at night. We will meet some of our nocturnal friends and discuss how they are adapted to the dark. We then will go outside for a night hike and see how we stack up against

ANIMAL HELPERS CADETTES

How do local animals help people? How can we interact safely with wildlife? How can we help wildlife? We will investigate these questions and more! This program also gives an overview of what the WINC does, and why animals come to us.

Ready to learn with us?

To request a program, please visit our website at helpingwildlife.org, under the "Education" tab select "Request a Program". Fill out the form and specify your program of choice in the comment section.

Concerned about the cost?

Our Leslie Kiehl WINC Education Program Fund is available to help groups pay for the WINC educational program fee if they are not able to afford all or some of this fee. More information can be found under the [Education](#) tab on our website.
