

Canoeing: Safety Activity Checkpoints

Canoeing is a great team-building activity and an enjoyable and relaxing way to experience the outdoors. Compared to kayaks, canoes tend to be larger and uncovered, and usually accommodate several people kneeling or sitting on a seat. Canoeists use either a single- or double-bladed paddle, and kayakers almost always use a two-bladed paddle. Canoeing is not recommended for Girl Scout Daisies;. It is not recommended that Girl Scouts of any age be permitted to paddle Class III rapids or higher.

Caution: You must seek council permission for activities with uncontrollable and highly changeable environment conditions, such as unclassified rivers and some watercraft trips; girls are never allowed on Class III and above whitewater.

Know where to go canoeing. Just about any body of water (lake, stream, river, ocean) is suitable for canoeing, so long as the proper equipment, instructions, and safety precautions are used. Canoeing is done only on water that has been approved by your Girl Scout council or that has been run and rated, and on whitewater only up to Class II difficulty, as defined by the American Version of the International Scale of River Difficulty. The American Whitewater Association provides information about American and some international river locations, classes, and levels. Connect with your Girl Scout council for site suggestions.

Include girls with disabilities. Communicate with girls with disabilities and/or their caregivers to assess any needs and accommodations. Learn more about the paddleability resources and information that the International Canoe Federation and British Canoe Union provide to people with disabilities.

Canoeing Gear

Basic Gear	
	Layered clothing that's easily changeable depending on temperatures (wool, nylon, or
	polypropylene pile)
	Waterproof jacket and pants
	Hat and change of dry clothing (no cotton; store in waterproof bag)
	Boat shoes, closed-toe and nonslip hiking/sport sandals with heel strap, or water socks or
	shoes (no flip-flops)
	Waterproof sunscreen (SPF of at least 15)
	Sunglasses
	Flashlight (and extra batteries)
	Emergency repair kit: duct tape or electrical tape, screwdriver, pliers
	Emergency survival packet: raincoat, waterproof matches, emergency food supplies,
_	lightweight/space blanket, and pocket knife
	Compass and chart of the area (for each adult)
Specialized	Gear
	Participants wear a U.S. Coast Guard–approved life jacket (Type III recommended) that fits
	according to weight and height specifications. Inspect life jackets to ensure that they are in
	good condition and contain no tears. Read about Coast Guard life jackets here.
	Wetsuit or drysuit recommended when water is colder than 70 degrees Fahrenheit (should
	be worn when the combined air and water temperature is less than 100 degrees Fahrenheit
	or when the combination of cool air, wind chill, and evaporative cooling may lead to
	hypothermia)
	Safety helmet (with flexible, strong, plastic shell with a chin strap and openings for drainage)
_	when canoeing in waters that are Class II and higher
	Paddles (select appropriate size and style for the canoeists and the activity); have extras on
	hand; on longer trips or trips involving whitewater, one extra paddle per canoe is carried; on
П	trips of 48 hours or less on flatwater, each group carries two to three extra paddles
	Bailer (a bucket used to remove water from a boat) or sponge
	Emergency sound device, such as a fog horn or sounding flares Painter (see "Canoeing Jargon" for definition) is secured to each end of the canoe
ш	Painter (see Canoeing Jargon for definition) is secured to each end of the canoe
Prepare fo	or Canoeing
	Communicate with council and parents. Inform your Girl Scout council and girls'
	parents/guardians about the activity, including details about safety precautions and any
	appropriate clothing or supplies that may be necessary. Follow council procedures for
	activity approval, certificates of insurance, and council guidelines about girls' general health
	examinations. Make arrangements in advance for all transportation and confirm plans
	before departure.
	Girls plan the activity. Keeping their grade-level abilities in mind, encourage girls to take
_	proactive leadership roles in organizing details of the activity.
	Ensure participants are able to swim. Participants' swimming abilities are classified and
_	clearly identified (for instance, with colored headbands to signify beginners, advanced
	swimmers, etc.) at council-approved sites, or participants provide proof of swimming-test
	certification. In the absence of swimming-test certification, a swim test is conducted on the
	day of the activity. Consult with your Girl Scout council for additional guidance.

	Arrange for transportation and adult supervision. Ensure that the skill level of the adults is higher than the difficulty of the intended activity and that they have firsthand knowledge of the hazards and rapids on the river to be run. The recommended adult-to-girl ratios are two non-related adults (at least one of whom is female) to every: 12 Girl Scout Brownies 16 Girl Scout Juniors 20 Girl Scout Cadettes 24 Girl Scout Seniors 24 Girl Scout Ambassadors
	Plus one adult to each additional:
	 6 Girl Scout Brownies 8 Girl Scout Juniors 10 Girl Scout Cadettes 12 Girl Scout Seniors 12 Girl Scout Ambassadors
	 Verify instructor knowledge and experience. For each of the following types of canoeing, one instructor or qualified adult is currently certified by the American Canoe Association, the American Red Cross, or other sponsoring organization approved by your council with the following certification(s) appropriate for the activity, or equivalent certification, or has documented experience according to your council's guidelines, as outlined in <i>Volunteer Essentials</i>: Flatwater canoeing: Flatwater, Moving, Paddling, or River Paddling Instructor Certification from the American Canoe Association, and the certification must include certification of Waterfront lifeguarding from the American Red Cross; the ratio of instructor to participant is 1 to 12. Whitewater canoeing: Whitewater Instructor Certification from the American Canoe
	Association or Small Craft Safety Instructor from the American Red Cross and the certification must include Swiftwater Safety & Rescue and Advanced Swiftwater Safety & Rescue; the ratio of instructor to participant is 1 to 8 Make this 1 to 5.
	• Canoe trips—flatwater and whitewater canoeing: The instructor must have the appropriate certification: Moving Water Instructor or White-Water Instructor from the American Canoe Association or Small Craft Safety Instructor from the American Red Cross; the ratio of adult to participant is 1 to 5.
Cor	npile key contacts. Give an itinerary to a contact person at home; call the contact person
	on departure and return. Create a list of girls' parents/guardian contact information,
-	ephone numbers for emergency services and police, and council contacts—keep on hand or
	t in an easily accessible location.
•	search river condition and select canoes appropriate to skill level. Consider weather and
	ter conditions, weight of passengers, and equipment. Also make sure of the following: Craft
	ight and capacity are not exceeded (some crafts clearly display maximum capacity).

- Canoes that are 15 feet or shorter hold no more than two people.
- Each canoe is sized for the number of people using it.

You are knowledgeable of the difficulty of the water run and the <u>International Scale of</u>
 <u>River Difficulty</u>.

	You are aware of possible changes in river level and weather and their effects on the The standard difficulty.	
	run's level of difficulty. Prepare for emergencies. If a lifeguard is not on duty, an adult with rescue and resuscitation	
	experience and/or certification is present; at least one adult has small-craft safety certification	
	or equivalent experience (both of these qualifications can be held by one person). Ensure the	
	presence of a waterproof first-aid kit and a first-aider with a current certificate in First Aid,	
	including Adult and Child CPR or CPR/AED, who is prepared to handle cases of near-drowning,	
	immersion hypothermia, and sunburn. If any part of the activity is located 30 minutes or more	
	from emergency medical services, ensure the presence of a first-aider with Wilderness First Aid.	
	See Volunteer Essentials for information about first-aid standards and training.	
	Respect the environment. Make sure canoeing on whitewater or semi-protected waters meets	
	the <u>Safety Code of American Whitewater</u> .	
	File a float plan. If participating in a long-distance canoe trip, file a float plan with local	
	authorities that includes names of people on board, destination, craft description, times of	
	departure and return, and additional details about routes and marine communications. The	
_	Coast Guard provides an <u>electronic</u> , <u>printable form</u> .	
	Know the Universal River Signals. The qualified adult and/or canoe instructor understands the	
	American Whitewater codes. Also, a set of whistle and visual signals is established that allows	
	messages to pass between canoes. Take river-rescue precautions. Instructor/qualified adult attaches a locking blade knife to life	
ш	jacket or secures it inside the canoe in an easily accessible place.	
	Transport canoes safely. Canoes are transported on car-top racks or trailers designed to haul	
_	canoes. Canoes are secured with two lines across the top and a line at the bow and the stern.	
	Encourage girls to pack wisely. Additional gear (clothing, sleeping, cooking) is stored in	
	waterproof containers or packages and secured in the canoe. Do not overload the canoe.	
On the Day of Canoeing		
	☐ Get a weather report. Never canoe on a stormy day. On the day of the activity, visit	
	weather.com, intellicast.com, or other reliable sources to assess weather conditions, water	
	temperature, and river/wave conditions. If weather conditions prevent the trip, be prepared	
	with a backup plan or alternative activity.	
	Conduct a swimming test. A test that determines a person's ability to handle herself when	
	pitched into the water is conducted.	
	Review rescue tips. Know how to <u>right a tipped canoe</u> and other river-rescue techniques.	
	Use the buddy system. Girls are divided into teams of two. Each girl chooses a buddy and is	
	responsible for staying with her buddy at all times, warning her buddy of danger, giving her buddy immediate assistance if safe to do so, and seeking help when the situation warrants	
	it. If someone in the group is injured, one person cares for the patient while two others seek	
	help.	
	☐ Be prepared in the event of a storm with lightning. Exit water immediately and take shelter	
	away from tall objects (including trees, buildings, and electrical poles). Find the lowest point	
	in an open flat area. Squat low to the ground on the balls of the feet, and place hands on	
	knees with head between them. During storms, if shore cannot be reached, secure all loose	
	gear, keep a sharp lookout for other boats and obstructions, and stay low.
